

Mateusz Binięda

PROFILE

Frontend Developer with 3+ years of experience building scalable and high-performance web applications. Specialized in modern JavaScript frameworks including TypeScript, React.js, and Next.js, with a focus on clean code, responsive design, and performance optimization. Experienced in delivering seamless digital experiences and maintaining strong communication with international clients. Highly motivated to expand knowledge, embrace new technologies, and contribute to innovative projects.

EXPERIENCE

07.2022 - present

SB Software

Frontend Developer, Solutions Developer

- Progressed from Intern to Junior and Mid Frontend Developer, ultimately promoted to Solutions Developer in June 2024
- Built and maintained fully responsive, user-friendly web applications using React.js and Next.js, leveraging TypeScript for type safety and maintainable code
- Developed state management solutions with Redux and Recoil, and integrated data fetching with React Query for scalable frontend architectures
- Designed and implemented modular, reusable components aligned with Figma systems, ensuring consistency across multiple projects
- Led automation testing initiatives using Cypress, creating end-to-end tests (e2e) and streamlining the QA process to enhance reliability
- Integrated REST APIs and third-party services for international clients, including payments, withdrawals, betting flows, and marketing features
- Participated in task estimations and cross-team initiatives, supporting onboarding of new developers and providing guidance

07.2015 - 09.2018

Hymax

CNC machine operator (seasonal)

- Operation of CNC machines and use of CAD software for technical design and adjustments
- Handling and management of warehouse operations and inventory

EDUCATION

10.2021 - 05.2022

CodersCamp powered by LiveChat - Bootcamp

Junior Full-stack Developer

10.2016 - 07.2021

University of Szczecin

Master's degree in Logistics
